Andrea Ramaglia Bianchino

UX Research · Interaction Design — MSc in Human-Computer Interaction and Design (28Digital)

+39 327 312 3846 · andrearamagliabianchino@gmail.com · andrearamagliabianchino.github.io

Available for a master's thesis internship (curricular) **from March 2027**, under an agreement with the Università di Trento (28Digital). **EU citizen.**

PROFILE

28DIGITAL MSc student in Human-Computer Interaction and Design, with a particular interest in **UX Research and Interaction Design**. During my first year at the Universidad Politécnica de Madrid (UPM), I built skills in **user research, prototyping and usability evaluation**. In my second year, at the Università di Trento, I am going deeper into **Cognitive Interaction, physical computing and hardware-based prototyping of interactive systems**, such as Arduino. My education combines human-centred design, user experience evaluation and the exploration of interactive technological solutions. I am looking for an internship linked to my master's thesis in my areas of interest, such as UX Research, Interaction Design, Cognitive Interaction and the prototyping of interactive systems.

EDUCATION

28Digital MSc in Human-Computer Interaction and Design (120 ECTS, double degree) — 2025–2027 (expected)

- **Universidad Politécnica de Madrid**, year 1 (2025–2026): Máster Universitario en Innovación Digital. GPA: **8.27/10**.
- **Università di Trento**, year 2 (2026–2027): Cognitive Interaction specialisation. Industry-based master's thesis.
- Selected courses: Programming of User Interfaces (9.7), Data Mining (10), Ethics for User Research (9.1), Evaluation of Interactive Systems, User Experience and Mobile Interaction, Affective Computing, Multisensory Interactive Systems.

28Digital Summer School "Build the future with intelligent embedded systems" — ISEN Méditerranée, Toulon (France), July 2026 (4 ECTS, grade 9/10)

BSc in Social Innovation, Communication and New Technologies (180 ECTS) — Università di Torino, 2020–2024

- Thesis: "Colour vision deficiency and web accessibility: analysis and strategies for inclusive navigation".

PROJECTS

The Interactive Mentor — Universidad Politécnica de Madrid, HCI project, team of 4 — Feb–Jun 2026
Dual-screen assistant that guides older adults through mandatory digital public services (medical appointment booking and bill payment).

- **Proposed the initial concept** and was the **main contributor to the low- and high-fidelity prototypes**.
- Full process as a team: context-of-use analysis (observation and interviews), comparison of two low-fidelity concepts, and a moderated think-aloud test with 6 users aged 53–82. We designed the protocol together; **I facilitated 2 lo-fi sessions** and observed 4 of the 6 hi-fi ones; I analysed the SUS and UEQ data.
- Results: **100% task success, SUS 78.75** ("good"), **UEQ good or excellent on 5 of 6 scales**, and 6 prioritised usability issues, each with a proposed fix.
- Working MVP in React Native, Expo and TypeScript with simulated public services: developed as a team, **design entirely mine**.

PosiBuoy — 28Digital Summer School, international team of 6 — Jul 2026
Eco-mooring buoys with environmental monitoring to protect Posidonia oceanica seagrass meadows.

- **Co-responsible for the experience design** and the prototype of the booking app for boaters.
- **Co-developed the web dashboard** for marine protected area managers: environmental data, buoy occupancy and alerts.
- Personas, user journey and business model (Business Model Canvas) defined as a team.

"Is it listening well?" — Università di Trento, individual project — Oct 2026 – ongoing
Real-time feedback on the capture quality of AI note-takers in meetings (distance, noise, overlapping speech).

- **Defined the problem** from scientific literature (CHI, Interspeech) and an analysis of existing products.
- Planned methods: critical-incident interviews, staged meetings with induced failures, and Wizard-of-Oz tests.

EXPERIENCE

Student Ambassador — 28Digital (formerly EIT Digital) — Mar 2026 – present

- Represent the master's programme at events and presentations at partner universities.

SKILLS

- **UX research and evaluation:** interviews, observation, context-of-use analysis, personas, user journeys, moderated usability testing (think-aloud), SUS, UEQ, heuristic evaluation, WCAG 2.2.
- **Design and prototyping:** Figma, low- and high-fidelity prototyping, Adobe Creative Suite.
- **Development:** JavaScript, TypeScript, React, React Native (Expo), HTML/CSS, Python, Arduino.
- **Data:** R, IBM SPSS Modeler.
- **AI tools:** Claude Code.

LANGUAGES

- **Italian:** native.
- **English:** B2 (IELTS Academic, 2025).
- **Spanish:** B2 (self-assessed according to the CEFR). One academic year of residence and study in Madrid.
